INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/03760

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>7-21, 29-34, 37, 38</u>	YES
	Claims <u>1-6, 22-28, 35, 36</u>	NO
Inventive Step (IS)	Claims <u>29-34</u>	YES
	Claims <u>1-28, 35-38</u>	NO
Industrial Applicability (IA)	Claims <u>1-38</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-6, 22-28, 35, and 36 lack novelty under PCT Article 33(2) as being anticipated by Davies (US Patent # 2, 826, 848). Davies discloses the claimed weapon grip for supporting a forward portion of a weapon comprising a clamp base, a portion of the clamp base being received by a handle, and clamps supported upon the clamp base for pivot motion for grasping the forward portion of the weapon.

Claims 7-9, 37 and 38 lack an inventive step under PCT Article 33(3) as being obvious over the prior art as applied in the immediately preceding paragraph and further in view of Lin et al. (US Patent # 6,438,888). Davies discloses the claimed weapon grip except for the clamps comprising a rail-receiving surface for engaging a lateral edge of a rail of a forward portion of a weapon. Lin et al. teaches a fixture for clipping accessories on a weapon wherein the clamps comprise a rail-receiving surface. The motivation to combine the rail-receiving surface as taught by Lin et al. with the weapon grip as taught by Davies would have been to obtain a more versatile hand hold for weapons.

Claims 12-21 lack an inventive step under PCT Article 33(3) as being obvious over the prior art as applied in the immediately preceding paragraph and further in view of Lochhead (US Patent # 2,360,881). Lochhead teaches utilizing the space inside a weapon grip for storage space. It would have been obvious to combine the storage space as taught by Lochhead with the weapon grip as taught by Davies and Lin et al in order to obtain a space to carry tools for the weapon.

Claims 29-34 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the claimed weapon grip assembly set out above and in the claims and further including a mandrel interposed between the handle and the clamps wherein the mandrel is axially translatable upon the post of the clamp base.

Claims 1-38 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
